

Relaxed

ZULKO 2018

BEAUTIFUL DOCUMENTS
USING WEB TECHNOLOGIES

Beautiful presentations, with languages you already know

- ▶ Design your themes using (S)CSS
- ▶ Write the content in Pug/markdown
- ▶ Enjoy lightning-fast PDF conversion, on any platform.

We will demo:

- ▶ Custom bullet points (wait... it's this slide)
- ▶ Components for technical presentations
- ▶ Progressive slides

What about technical presentations ?

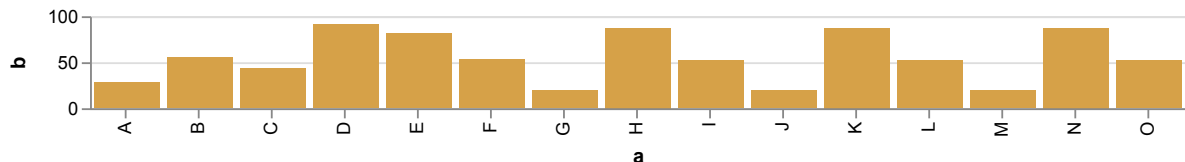

You can write equations with MathJax:

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}.$$

Or code snippets with Highlight.js:

```
def relax(n_times):  
    for i in range(100):  
        print ("Aaah. I'm so ReLaXed.")
```

Or even plots with Vega-lite:

What about progressive slides ?

No problem ! This is done with Pug's native syntax, which enables even more complex logics !

For instance this slide has steps:

What about progressive slides ?

No problem ! This is done with Pug's native syntax, which enables even more complex logics !

For instance this slide has steps:

- ▶ Hey ! I am a paragraph appearing at step 2.

What about progressive slides ?

No problem ! This is done with Pug's native syntax, which enables even more complex logics !

For instance this slide has steps:

- ▶ Hey ! I am a paragraph appearing at step 2.
- ▶ Hi there ! I appears at step 3, and disappear at step 4.

What about progressive slides ?

No problem ! This is done with Pug's native syntax, which enables even more complex logics !

For instance this slide has steps:

- ▶ Hey ! I am a paragraph appearing at step 2.
- ▶ Heya ! I appear at step 4

What about progressive slides ?

No problem ! This is done with Pug's native syntax, which enables even more complex logics !

For instance this slide has steps:

- ▶ Hey ! I am a paragraph appearing at step 2.
- ▶ Heya ! I appear at step 4

That's all for the moment folks, come back later to see if there is more !
